The action of helping customers
with what they need.

For Offices, Warehouses, & More!

Amerex® ABC DRY CHEMICAL FIRE EXTINGUISHERS use a monoammonium phosphate dry chemical to insulate Class A fires by melting and clinging to the heated surface. On Class B fires, they smother and break the chain reaction and are non-conductors of electricity. USCG approved with bracket listed on the UL label.

AMEREX® FIRE EXTINGUISHERS

Perfect for kitchens, garages, boats, and vehicles, **Amerex® BC DRY CHEMICAL FIRE EXTINGUISHERS** contain a siliconized sodium bicarbonate based dry chemical, making them suitable for combating flammable liquid and pressurized gas fires. They are electrically non-conductive, and the chemical, by nature, will not bake to hot surfaces, allowing for easy clean-up. USCG approved with bracket listed on the UL label.

Specially designed for commercial and industrial applications that handle, transport, process, or store large quantities of flammable liquids and gases, these **Amerex® HIGH FLOW PORTABLE FIRE EXTINGUISHERS** are the perfect choice, especially for spills on flat horizontal surfaces with combustible/non-combustible materials and potential obstacles to fighting a fire. They are made with the same hardware and valve components as **Amerex's** standard models but with twice the flow rate. USCG approved with bracket listed on the UL label.

An environmentally safe replacement for Halon 1211, **Amerex®** **HALOTRON® I FIRE EXTINGUISHERS** contain a hydrochlorofluorocarbon (HCFC-123) blend agent that discharges as a rapidly evaporating liquid, leaving no residue. Pressurized with argon gas, the **Halotron I** agent is an EPA approved "clean agent" for Class A, B, and C hazards that will not conduct electricity back to the operator. Models **AX386T**, **DDPAX386TC**, **AX397**, and **AX398** are USCG approved with bracket listed on the UL label.

Amerex® **HALON 1211 FIRE EXTINGUISHERS** feature solid-steel cylinders with all-metal valves and use all-recycled gas, in accordance with the Montreal Protocol. Halon 1211 is a liquefied gas pressurized with nitrogen, which discharges as a vapor, causing no cold or static shock and no impairment of the operator's vision. This clean agent quickly penetrates difficult-to-see and hard-to-reach areas and leaves no residue. USCG approved with bracket listed on the UL label, except for models **DDPAX344T** and **DDPAX344TC**.

Amerex® HIGH-PERFORMANCE DRY CHEMICAL FIRE EXTINGUISHERS feature superior vertical and horizontal range with a high 240 psi operating pressure. Select **Fast Flow** models offer high flow rates, fast discharge, quicker knockdown, and increased operator protection. Select **Compliance Flow** models offer longer range and higher UL ratings. Cylinders are made of painted galvanized drawn steel with protective rubber foot rings and feature all-metal valve construction and gauge guards. Extinguishers come with a standard wall bracket and a 12-year warranty. USCG approved with bracket listed on the UL label.

FOR USE ON COMBUSTIBLE METALS ONLY

RP257

Designed ideally for use on combustible metal fires, **Amerex®** CLASS D DRY POWDER FIRE EXTINGUISHERS are fitted with a "soft-flow" extension applicator to keep operators away from extreme heat and toxic fumes caused by burning material. The applicator can be quickly removed (to provide a straight stream of chemical) when greater range, a narrow discharge pattern, or a lobbing effect is required. Comes with a special corrosion-resistant yellow (Class D) color-coded paint finish. FM approved.

Amerex® REGULATED PRESSURE WHEELED FIRE EXTINGUISHERS feature a 110 cu ft nitrogen cylinder with a pressure regulator and $2^1/_2$" x 36" steel wheels. This traditional design allows for adequate pressure to ensure a smooth, complete discharge of the dry chemical with a pressure reserve for blowing down the discharge hose. Easy to transport and operate by one person. USCG approved. Call your Account Manager for quantity pricing.

Amerex® WHEELED HALOTRON® I FIRE EXTINGUISHERS feature the same qualities found in all **Amerex®** products and add the convenience of a clean extinguishing agent with a low GWP (Global Warming Potential) and a low ODP (Ozone Depletion Potential). **Halotron I** has a short atmospheric lifetime, and each unit maximizes agent visibility during discharge. There is no thermal shock, static shock, or electrical conductivity back to the operator. EPA approved clean agent for Class A, B, and C hazards as well as FAA approved for both ramp use (ARFF vehicle) and on-board an aircraft. Call your Account Manager for quantity pricing.

NOTE: All prices quoted are FOB factory unless shipped from stock. All nitrogen cylinder operated wheeled extinguishers are shipped with the "DRY CHEMICAL" agent in pails. Most wheeled units are available in a stationary configuration. Inquire about special quantity pricing.

Square Thread Design Means Faster Valve Removal

Badger™ ADVANTAGE MULTI-PURPOSE FIRE EXTINGUISHERS are made to handle easier and be recharged quicker, thanks to a larger neck opening. The square thread design allows the valve to be removed and installed quickly. Heavy-duty plated steel siphon tubes are threaded for a more secure connection, and the polymer hose strap will not scratch the cylinder. Larger pull pins and handles are easy to operate—even with work gloves.

When high-hazard fires demand a fast one-person response and exceptional performance, look to **Badger™ WHEELED STORED PRESSURE DRY CHEMICAL FIRE EXTINGUISHERS** to make it possible. Their long-range discharge offers control over ordinarily out-of-reach fires, allowing the operator to keep a safe distance from the fire source and smoke. The 50 lb unit provides cost-effective, reliable fire protection. USCG approved. All feature brass valves.

Badger™ WHEELED REGULATED RELEASE DRY CHEMICAL FIRE EXTINGUISHERS are recommended for chemical or petroleum plants, storage facilities, airports, warehouses, construction sites, equipment depots, and other high-hazard locations where dry chemical is the preferred agent. With 16" semi-pneumatic wheels, these units are highly mobile, permitting a single operator to extinguish fires that would normally require several operators with large portables. Equipped with brass valves.

Badger™ WHEELED CARBON DIOXIDE (CO₂) EXTINGUISHERS provide excellent protection for certain flammable liquids and energized electrical equipment. They can be operated by a single person, and the squeeze-grip control valve design allows for easy use. They are generally reserved for indoor use where wind and drafts will not disperse a discharge pattern. Carbon dioxide is a clean agent that leaves no residue. Equipped with brass valves.

FIREBOY® FIRE EXTINGUISHERS

Fireboy® HFC-227 CLEAN AGENT FIRE EXTINGUISHER SYSTEMS are the cleaner, safer, and more-effective alternative to dry chemical portable fire extinguishers. They leave no residue or powdery mess behind and have a quicker fire-out time. When 175°F (79°C) is reached, the extinguisher will automatically discharge, releasing the clean agent gas to totally flood the entire space, smothering the fire. For occupied and unoccupied areas and most all marine applications. Approved for Class B fires.

E42096

If fire breaks out aboard a diesel-powered vessel, continued operation may remove the agent, creating the possibility of re-ignition. But not with **Fireboy®** **AUTOMATIC SHUTDOWN SYSTEMS**— they respond automatically when a **Fireboy** system discharges. Available in three different model series, they can shut down up to eight different engines. All **Shutdown Systems** are solid state for greater reliability and come with an integrated alarm horn, charged/discharged lights, and an override switch for restart or control of auto shutdown.

P/N	DESCRIPTION
ES300001	Diesel Engine Shutdown, 12V, 3 Circuit

RECHARGE CHEMICAL

Our **UL CLASSIFIED UNIVERSAL DRY CHEMICAL** is ideal for use in many manufacturers' fire extinguishers, per NFPA 10. This dry chemical agent consists of a carefully controlled range of particle sizes blended with a flow-promoting and anti-caking chemical for smooth delivery. Each particle is silicone coated for optimum moisture repellency and minimum friction during discharge. 50 lb.

P/N	DESCRIPTION
50ABCULC	UL ABC Dry Chemical

Our **UNIVERSAL RECHARGE DRY CHEMICAL/ POWDER** agents consist of a carefully controlled range of particle sizes of sodium bicarbonate or potassium bicarbonate, blended with a flow-promoting and anti-caking chemical. The agents are formulated and manufactured for both long discharge range and smooth, uninterrupted flow. Each particle is silicone coated to provide moisture repellency and minimum friction during discharge. 50 lb.
